NITIN KUMAR MISHRA

AI ENGINEER • SOFTWARE DEVELOPER

Bhopal, India | +91 7489078947 | nitiniszod10@gmail.com

PORTFOLIO GITHUB LINKEDIN

SUMMARY

AI engineer and founder who turns ambiguous problems into shipped products, from LLM architecture to the full-stack interfaces people actually use. Built **DocuVerse**, an AI-native engineering intelligence platform, and delivered production agentic systems, RAG pipelines, and MCP-native developer tools for real clients. 8× hackathon winner and NASA Space Apps regional winner who pairs deep GenAI craft (LangChain, LangGraph, AWS) with product sense to ship systems that scale.

PROFESSIONALEXPERIENCE

Founder & Product Lead, DocuVerse | Logorhythms — 2026 – Present

Building an AI-native engineering intelligence platform that turns codebases into narrated audio-visual walkthroughs and unifies knowledge across GitHub, Slack, Jira, Notion, Linear & Confluence. Designed the confidence-scored cited-answer engine and shipped native MCP integrations for Cursor, Claude, and VS Code.

Co-Founder & Technical Lead | Bug Biceps — Ongoing

Co-founded an AI startup delivering end-to-end Generative AI and full-stack solutions; led client discovery, technical demos, and solution scoping for AI automation use cases.

Full Stack Engineer (Intern) | Entop Learning — Current

Designed and developed a complete Learning Management System with role-based dashboards for students, instructors, and admins, including authentication and admin tooling.

Open Source Mentor | GSSoC'26 (GirlScript Summer of Code) — 2026

Mentored contributors on a real-world AI-agent build track, guiding issue selection, code reviews, and PR quality. Coached prompt engineering, tool-calling agents, and RAG fundamentals for production-ready work.

AI Developer & Lead, Technical Operations | Haron India — Previous

Architected and deployed production-grade agentic AI systems covering multi-step orchestration, tool-calling agents, and LLM decision pipelines, and built RAG pipelines with contextual grounding for enterprise knowledge bases.

Head, Alumni Relations | Student Activity Council, OIST Bhopal — 2025 – 2026

Led alumni engagement, mentorship programs, and industry networking events; coordinated across alumni, faculty, and student bodies to drive institutional growth.

KEYPROJECTS

Docuverse by Logorhythms: Shipped a production-grade intelligence platform with narrated code walkthroughs, cited cross-tool answers, blast-radius analysis, and a unified intelligence layer over Slack, Linear, GitHub, Notion, Jira & meetings. *LangChain · LangGraph · MCP Servers · Vector DBs · AWS (Bedrock, Lambda, S3, DynamoDB)*

SonicPersona: AI that learns a person's vocal identity, fine-tuning a personalized TTS voice with LoRA adapters on XTTS v2, auto-transcribing training audio, and serving real-time generation. *LoRA · Whisper · Gradio · PyTorch*

Train-a-miniGPT: Educational framework for implementing and training a GPT-style language model from scratch, packaged as interactive Colab-ready notebooks. *JAX AI Stack · Jupyter*

Campus Mitra: RAG-based chatbot for college admission queries with contextual grounding, demonstrating production RAG fundamentals end-to-end. *LangChain · Embeddings · Semantic Search · Vector Retrieval*

PyDev: LoRA fine-tuned code-generation LLM optimized for low-VRAM environments. *Hugging Face · LLM Fine-Tuning · ML Deployment*

DiffuMint: Stable Diffusion v1.5 LoRA fine-tuning framework designed to run on free-tier GPUs. *Diffusers · LoRA · Model Optimization*

AtmoPredict: Multi-model weather forecasting system for next-year predictions. *LightGBM · Random Forest · Logistic Regression · XGBoost*

ACHIEVEMENTS

- **8× Hackathon Winner**
- **19× Software Hackathon Finalist**, national & university levels
- **National Level Ideathon**, Runner-Up
- **NASA Space Apps Challenge 2025**, Regional Winner & Global Nominee
- **OpenAI Builders Hackathon**, Finalist

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning | Oriental Group of Institutes, Bhopal — 2024 – 2028
